Summary:

This documentation will give you, the client, insight on how your website will be structured based on the layout itself. The site map will demonstrate the primary navigation within your site. You can view the .png file on page 2 or interact with it yourself by clicking on this link: <http://allisondsharpe.slickplan.com/rpxcalfq>.

The Asset Tracker is a spreadsheet that displays each asset for this project and the details that go with it, such as the asset name, due date, and the person responsible for providing this asset.

The wireframes display how your site will be structured page by page. You can think of these as blueprints to your website.

Lastly, the approval page is where you will print your signature as well as the date to proceed with this project. Please let me know if you need further clarification.
